EDUCATION

Indian Institute of Information Technology, Una

2023 – Present

B.Tech in Electronics and Communication Engineering

CGPA: 7.03

SKILLS

- **Programming Languages:** C, C++, HTML, JavaScript, Python, Java, SQL
- **Core Skills:** OOPS, DBMS, OS, Computer Networks, Data Structures, Algorithms
- **Frameworks & Libraries:** React.js, Node.js, Express.js, TailwindCSS,
- **Developer Tools:** Git, GitHub, Docker, Vercel, AWS(Basics), MongoDB, PostgreSQL, Postman
- **Soft Skills:** Leadership, Teamwork, Public Speaking, Event Management, Communication

PROJECTS

•Paras Car Rentals – Self-Drive Car Rental Platform (Freelance)

Jan. 2026

MERN Stack, React, Node.js, Express, MongoDB, Tailwind CSS, JWT, ImageKit

[GitHub](#) | [Live](#)

- Delivered a scalable full-stack car rental platform for a **real-world client**, currently serving **200+ active users**, enabling vehicle discovery and bookings through a centralized owner-controlled system.
- Architected a secure authentication and session management flow using **JWT, bcrypt, and OTP-based email verification, with TTL indexing** to optimize database hygiene.
- Built an optimized booking engine with date-overlap validation and a **5-stage booking lifecycle**, while implementing **SEO best practices (meta tags, sitemap, robots.txt, Google indexing)** to enhance search visibility and operational accuracy.
- Improved performance and user experience by integrating **ImageKit CDN** for media optimization and developing responsive, role-based dashboards using React and Tailwind CSS.

•LegalEase – AI-Assisted Lawyer Consultation Platform

May 2025

HTML, CSS, JavaScript, Groq API, Node.js, Express, MongoDB, Cloudinary, JWT

[GitHub](#) | [Live](#)

- Designed an **AI-enabled** legal consultation platform supporting one-to-one lawyer interactions with a 3-tier role-based access control model.
- Implemented an **AI-driven lawyer matching pipeline using Groq API integration**, combining semantic case analysis with rule-based scoring for accurate recommendations.
- Developed scalable backend services with Node.js and Express, exposing 30+ optimized **REST APIs** across 7 modular legal workflows.
- Strengthened data privacy and system reliability by integrating **Cloudinary** for secure document handling and enforcing strict authorization boundaries.

•LifeFlow – Real-Time Blood Donation Platform

2025

MERN Stack, MongoDB Geospatial Indexing, Twilio API

[GitHub](#) | [Live](#)

- Engineered a location-aware donor discovery system using MongoDB **2dsphere** indexing, optimizing emergency donor searches with up to 50% faster query execution.
- Built secure, role-specific REST endpoints with JWT-based access control, middleware validation, and centralized error handling to protect critical healthcare data.
- Developed an asynchronous SMS notification pipeline using **Twilio** with retry and failure-handling mechanisms to ensure high alert delivery reliability.
- Created real-time operational dashboards to analyze request load, donor participation, and response patterns, improving coordination during time-sensitive emergencies.

ACHIEVEMENTS

- Secured **3rd position** in the **SkillAbhudaya - Hackathon** held at IIIT UNA.
- Solved over **250+ DSA problems** on competitive coding platforms such as LeetCode, CodeChef & GeeksforGeeks.
- Rated **2 star** at CodeChef (Max Rating: **1571**) Profile

POSITIONS OF RESPONSIBILITY

President, EPMOC — Management & Event Organizing Club, IIIT Una

Dec 2025 – Present

Team Lead, Mridang 2K25 — Annual Cultural Fest

2025

Team Lead, NoScope 2K25 — National level E-gaming Tournament

2025
